REVENUE
OPTIMIZATION

Executive Summary

Operational Insights

- Cancellation rate is high at **30.91%**, impacting revenue and customer satisfaction
- Revenue is concentrated in a few cities like **Hyderabad** and **Nashik**
- Customers aged **46-60** contribute the highest order volume
- Pending and delayed orders remain significantly high during operations

Strategic Recommendations

- Implement real-time delivery tracking
- Target 26–35 age group
- Optimize delivery fleet
- Promote low-performing regions aggressively
- Analyze city-wise cuisine preference
- Expand partnerships in low-performing cities
- Increase customer retention initiatives

Dashboard 1 – Executive Summary

Delivery Performance at a Glance

Key Operational Metrics

- Average delivery time is **54.41 mins** — nearly double the 30-min SLA target
- Scooter-based deliveries handle the **highest order volume** vs. bikes and cycles
- Indian cuisine generates the **highest revenue** across all categories
- Total delivery distance: **7.52K km**, reflecting high operational workload

Strategic Recommendations

- Implement AI-based route optimization
- Introduce real-time delivery monitoring
- Improve restaurant preparation coordination
- Allocate vehicles based on delivery distance and traffic conditions
- Promote high-performing cuisines through targeted offers
- Introduce combo deals and personalized recommendations

Dashboard 2 - Delivery Performance

Revenue Challenges & Restaurant Performance

Key Operational Metrics

- Monthly revenue shows fluctuations, with a noticeable dip in **April and June**
- Revenue generation is concentrated among a few restaurants, creating dependency risks
- Payment method contribution is uneven, limiting digital payment optimization opportunities
- Restaurant performance varies significantly across locations and cuisines

Strategic Solutions

- Introduce targeted offers during low-performing months
- Improve restaurant preparation time monitoring
- Reward top-performing restaurant partners and support low-performing with promotions
- Encourage digital payments with cashback offers

Dashboard 3 - Restaurant & Revenue Analytics

Food Delivery Performance

Key Operational Metrics

- Average delivery time is high, affecting customer satisfaction and operational efficiency
- Cancellation rate impacts overall delivery success performance
- Delivery partner performance varies significantly, indicating operational imbalance

Strategic Improvement Plan

- Implement AI-based route optimization
- Enable automated dispatch systems
- Create delivery partner ranking & incentive programs
- Monitor low-performing riders through KPI dashboards
- Increase customer retention through loyalty programs
- Improve operational efficiency to enhance customer experience

Dashboard 4 - Food Delivery Performance Analysis

Restaurant Revenue & Performance Analysis

Key Operational Metrics

- Revenue contribution is uneven across cities
- Restaurant performance heavily depends on ratings
- Order completion performance varies across restaurants, indicating operational inconsistency
- Revenue concentration among limited restaurants increases business dependency risk

Performance Optimization Strategy

- Monitor low-rated restaurants through KPI scorecards
- Improve food quality and delivery coordination
- Promote underperforming restaurants through targeted campaigns
- Expand cuisine variety across cities
- Use customer feedback analytics to improve ratings
- Optimize order fulfillment process
- Identify high-performing cities and replicate successful models
- Track restaurant SLA and customer satisfaction metrics regularly

Food Delivery Operations Analytics

Unified Recommendations for Operational Excellence

Delivery Optimization

Implement AI-based route optimization and real-time monitoring. Increase rider allocation during peak hours.

Cancellation Reduction

Monitor restaurant SLA, enable automated dispatch, and improve customer communication proactively.

Revenue Growth

Launch city-specific campaigns, expand cuisine partnerships, and promote underperforming restaurants.

Customer Engagement

Build loyalty programs, personalize offers by behavior, and target 26–35 age group with rewards.

Thank You
